

ALLOTT (NIGERIA) LTD

..... Consulting Engineers

Water Supply, Sewerage and Sewage Treatment.

Client: Nigerian Army Engineers, Victoria Island

Location: Lagos State

Date: 1986

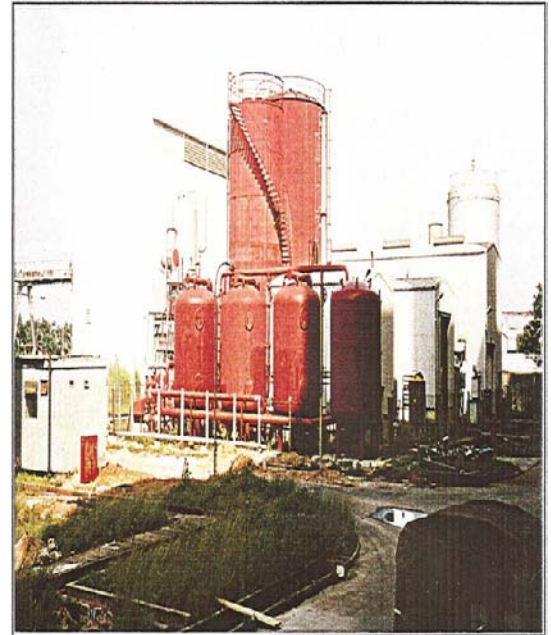

A comprehensive scheme including sewerage, sewage treatment and water supply for a population of 12,000 people is being carried out in conjunction with a local firm Unecon Associates. The project area is located on low lying ground on Victoria Island in a busy district of Lagos.

Water supply system including groundwater boreholes up to 125m depth, reservoirs of 2,000m³ capacity, pumping stations, water treatment plant and distribution mains. Sewerage and sewage treatment facilities including 5.2km of gravity sewers, pumping stations and treatment works comprising inlet works, settlement tanks and oxidations ditches.

Detail studies undertaken as part of the project include:

- Investigation of existing conditions
- Topographical survey
- Soil investigation
- Ground water analysis
- Drainage studies
- Cost estimates
- Preliminary Engineering Report

Allott (Nigeria) Ltd undertook the feasibility study, detailed design and supervision of construction including preparation of contract drawings, schedules and documents.
